INTRODUCTION

One of the key responsibilities of EHS professionals is ensure proper incident accident investigations are undertaken so as to identify and address the root cause of the incident/accident. Knowledge of a systematic methodology with appropriate tools and techniques is essential for the EHS professional. This workshop is designed to equip the EHS professional in this regard.

Our methodology is designed around the well known PDCA cycle with tools drawn from the repertoire of the 7QC tools. This methodology has been refined to meet the specific requirements of the EHS professional.

COVERAGE

- Essential features of incident investigation
- Incident investigation methodology
- Use of appropriate tools and techniques at each stage of the investigation process
- Improving quality of incident investigation.
- Drawing conclusions and
- Effective implementation of corrective and preventive actions
- Supplemented at every stage by practical case studies

FACILITATORS

Internationally certified safety management professionals, with experience in aerospace, nuclear, biological, engineering, pharmaceutical, infrastructure, metro rail, process and defense sectors, who have been closely associated in bringing about cultural change and implementing Safety Management Systems.
