About eLearning Program: -

There is continuous increase in number of organisations understand that good safety and health is more than a benefit to workers – it is a core business value and a cornerstone of a civilised society. An international standard for effective risk management will tackle the global toll of safety and health failures, protecting working people worldwide and reducing the cost to the global economy. At the same time, it will help organisations to improve their reputation, resilience and results.

ISO 45001 is the new international standard that gives organisations a framework to improve employee safety, reduce workplace risks and create better, safer working conditions. It was published in March 2018, replacing BS OHSAS 18001. It is risk-based and uses the familiar 'plan-do-check-act' approach, together with the high-level structure common to all new management system standards.
