1. Objectives

- a. To examine the best practices of public-sector organizations in delivering services using enabling technologies in a cost-effective, efficient manner;
- b. To discuss how greater access to technology will enhance the connectivity between citizens and public-sector organizations; and
- c. To develop recommendations that will improve strategies to enhance the delivery of public-sector services using digital technology.

2. Background

There are manifold needs for improving public service delivery, from improving the quality of services to citizens, to reducing public spending, to continuously modernizing public services. The rise of the digital society has heightened expectations of e-service among citizens and businesses. Intelligent process automation, advanced analytics, and other developing technologies are changing the way governments and agencies deal with citizens' demands. They have come to expect and rely on convenience in their daily lives as technology evolves. Technology is no longer employed simply to automate back-office functions and improve public-sector productivity but has assumed a transformative role in public service design and delivery including offering smart solutions that address citizens' expectations and forging new relationships with government. A smart government therefore creatively invests in emerging technologies coupled with innovative strategies to achieve more agile, resilient governance structures and infrastructure.

This conference will explore the impacts and best practices of digitization of public services of various governments, especially those in APO member countries. Specifically, this conference will bring together different stakeholders to share and learn about the best practices in delivering quality public services to citizens using enabling technologies and how this will impact the accountability, transparency, efficiency, and effectiveness of the public sector.

3. Modality of Implementation

- a. This conference will be conducted online using videoconference applications.
- b. The resource speakers and participants will participate the session virtually using their own devices, applications, and Internet connections.
- c. The duration of the session will be up to three hours.
