

National Productivity Council

Non Residential Training Programme on

Policy making, institutional framework, governance and
strategies – Scoping redesign prospects and initiatives

30-31 January, 2025

Delhi

1. ABOUT NPC

National Productivity Council (NPC) is an autonomous organization under the Department of Promotion of Industry and Internal Trade, Ministry of Commerce & Industry, Government of India. The present expertise available in NPC has a resource base of professionals from fields such as Economics, Regional Development, Industrial Engineering, Human Resource Management, Energy, Environment, IT, Project Monitoring and Evaluation, Research Studies and Baseline Surveys. In addition, services of external professionals and subject matter specialists are also sought on need basis, depending upon the nature and scope of work. NPC extends services from its headquarter at New Delhi and 12 regional offices across the country manned by more than 120 full time professionals. NPC has professionals from diverse fields to provide Consultancy, Capacity Building / Training and Project Monitoring Unit (PMU) services to various organisations including Central Government Ministries and State Governments and national and international institutions and agencies.

2. PROGRAMME THEME

The process of economic growth and development is a dynamic process engaging the various agencies and stakeholders from citizens to industry to enterprises across the product manufacturing and services provisioning components and the supply chain and the role of public sector and private sector and institutions and the government are significant and fairly demarcated. Yet there are deep interlinkages and two way and multidirectional processes pertaining to innovations in products and services provisioned and the diffusion across the demographic and geographic terrain that get guided by the policy frameworks and decision-making processes in the various regimes and democracies having their own varieties of institutionalised components that generate initiative and implement action across thematic areas and disciplines. Effective institutional frameworks and private sector ecosystems are crucial for progress, with coordination and cooperation being essential. Policies, visions, and leadership in both public and private sectors shape resource allocation and economic outcomes. Governance mechanisms, policy-making, program design, project implementation, and evaluation across various agencies are vital for socio-economic development and growth.

This residential training program revisits key aspects of institutions, policy making, governance, and project implementation in national and regional development contexts. It aims to enhance the skills of policymakers, program designers, and implementers through shared experiences, case studies, and hands-on exercises in thematic areas detailed in the brochure.

3. LEARNING OBJECTIVES

- The training programme highlights institutional framework and dynamics, governance system and strategies, policy making and scheme design and implementation and evaluations and related features.
- It opens a wider canvas for learning and deliberations on a spectrum of thematic areas / sectors and sub-sectors and brings together specialists and practitioners from various cadres / institutions among faculty and participants as well as from public and private enterprises
- In this programme we will visit the institutional features, governance aspects and strategies, project conceptualisation, sectoral policy evolution and programme development and Monitoring & Evaluation in a collective and deliberative process. It brings experiences, case examples and insights with undertaking case exercises reflecting of policy making, guidelines development etc and M&E activities and project implementation experiences. The coverage is sought to span a broad context across industry/manufacturing, health, transport, energy, environment, science and technology and a few domains of infrastructure development etc

- Further delving into the public goods provisioning landscape and reflecting on the urban and rural development aspects, as well as address some of the notified rules/ acts and provisions and reflect on achievements and a way forward oriented policy evolution roadmaps.

4. BROAD PROGRAMME COVERAGE

The following key topics are sought to be covered during the training programme along with indicated sub components (Please note : The themes/sub-themes may evolve/change etc to strengthen the programme coverage and to meet learning objectives including expanding on the content and material development for the programme toolkit).

1. Review of the policies and policy making features/processes and the history and evolution of regimes, democratic principles, and nation-states. Further, exploration of civilization contexts, democratic paradigms, and institutional frameworks, along with organizational behavior and the prospects for future developments.
2. Examination of the nature of institutions, their roles, rules, and networks, and principles of administration. Coverage of service provisions, rights, and duties, and highlights regarding federal framework and local governance, while addressing challenges in coordination and revitalizing systems for public interest.
3. Exploration of the policy making and political psychology aspects, and focusing on political and institutional will. Revisiting development needs, multi-level governance, policy gaps, stakeholder consultations, and include field insights, data reviews, case sharing, and discussions on policy design and implementation.
4. Addressing Indian industrial development features covering industrial clusters, and Micro/Small/Medium and Large Enterprises in both formal and informal sectors. Further, examination of the cluster approach, competitive and comparative advantages, industrial cluster experiences, incentive schemes, industrial park ratings, cluster rating methodologies, and prospects for product and technology mapping.
5. A focus on infrastructure development by examining case study(ies) on infrastructure needs, gap identification, and solutions. We will explore key infrastructure areas that drive economic growth to address and enhance infrastructure strengthening aspects.
6. A revisit to the Health Sector scenario and policy framework and related evolution in recent years and addressing of challenges and dynamics for the sector. Reflecting on case study(ies) or new range of initiatives and related evolving efforts to contribute to strengthen health sector
7. Exploring of the energy scenario and emerging roadmap(s) for energy provisioning and services including centralised and decentralised approaches and related developments within renewable and non-renewable energy sub-sectors and experiences in the pathway of energy security
8. Addressing environmental protection, management, and sustainability aspects and focusing on Circular Economy principles.
9. The context of Impact Evaluation and M&E features and evolving aspects on monitoring and evaluation of programmes / schemes and projects and the approaches including concurrent M&E strengthening and utilising / integrating additional productivity indicators.

10. Panel discussion on social issues within policy making and program design such as in sectors like Human Resources and Skill Development, human rights and various other dimensions.

11. Exploration of mental/mind frameworks and cognitive strategies to contribute to and strengthen policy making and choice making processes, focusing on strengthening sustainable cognitive structures and informing policy design and interventions.

5. TARGET PARTICIPANTS
