## 2. PROGRAMME THEME

A 'work life' balance refers to employees' ability to uphold a healthy balance between their work roles, their personal responsibilities and family life. Achieving a work-life balance is the new ideal for employees, because an imbalanced life results in stress and fatigue, loss of control and even strained relationships. Modern workplaces have become more stressful because of diverse role expectations, cut throat competition, globalization and technological disruptions. Such changes have created several complications on both the domestic and professional fronts of the employees. Stress affects productivity; therefore, monitoring and managing work related stress is extremely important. The individual must explore his values, aspirations, and goals to realise what he expects from work and life and then develop the suitable ways of balancing work and life. Effective stress management, on the other hand, helps break the hold stress has on life, so the subject would be happier, healthier and more productive. The ultimate goal is a balanced life, with time for work, relationships, relaxation, and growth—the resilience to sustain pressure and meet challenges head on.
