

Webinar Title: ANOVA- A Statistical Tool

Registration Fee (including GST): Rs.99/-

Video Category: Human Resource Management

About Webinar Program: Statisticians are comparing two different samples and arriving at the conclusion unless Ronald Fisher, father of modern statistician and experimental design, came up with the scientific tool of comparing three or more samples with different sample sizes and this is known as Analysis of variance or ANOVA or F test. The scientific procedure of F-test is explained clearly.

Webinar Course Coverage: This online workshop will help the participants to understand and apply the F test of one way and two-way classification. They can apply to various situations to see whether all means are same or different.

Thanks & Regards
