Webinar Title: Role of Analytics in Manufacturing Efficiency

Registration Fee (including GST):- Rs.99/-

About Webinar Program (Brief One para): Analytics help manufacturers solve previously impenetrable problems and reveal those that they never knew about, such as hidden bottlenecks or unprofitable production lines. There are applications of analytics in particular that together are powerful tools for maximizing the physical and financial performance of manufacturers' assets and often-complex supply chains.

Webinar Course Coverage (Specify Module details):

Expert Speaker – Mr. Surendra P. Tiwari, Director, Quality Growth Services Pvt. Ltd

Course covers understanding manufacturing chain and the role of analytics from manufacturing point of view. You will get to know data collection techniques and tools used for analytics that can improve productivity. Its benefits over conventional manufacturing techniques.

Register to learn (Key Webinar' in bullet points):

- Understanding Manufacturing Chain

- Type of analytics/ data needed to strengthen manufacturing
- Current level of analytics in manufacturing
- Limitation of current analytics
- Analytics tool that can help improve manufacturing Efficiency
- Effect of advanced analytics on manufacturing effectiveness and efficiency

Thanks & Regards

NPC Team
