# INDUSTRY 4.0 WEBINAR SERIES

---

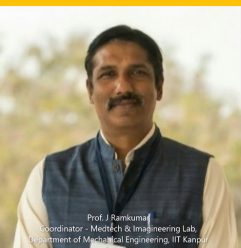

- **Quality is the competitive edge for the products and services. A quality product/ service is an outcome of quality processes. Moreover, we cannot expect quality product/ service from unreliable machines/ equipment. Then, technological advances over a period of time have resulted in an industrial revolution often referred to as the fourth industrial revolution or "Industry 4.0".**
- **"Quality 4.0" is a term used for the quality and operational excellence technologies, systems in reference to Industry 4.0.**
- **"Maintenance 4.0" includes digitally assisted technologies for data sourcing, collection, integration, analysis and recommended actions for ensuring asset reliability and management.**

## WEBINAR COVERAGE

- **Industrial Revolution; Quality 4.0 and Maintenance 4.0**
- **Quality 4.0 Principles**
- **Quality 4.0 Tools**
- **Overall Equipment Effectiveness**
- **Maintenance 4.0**
