About Webinar (Brief One para):-

Today, we are in the Fourth Industrial Revolution or Industry 4.0 which is poised to impact all aspects of our personal and professional lives and will create a paradigm shift in our approach towards everything including education. The fundamental objective and approach of Education 4.0 is to make a quantum shift from traditional pedagogy to revised modern ways. It is aimed to inculcate changes in our lives so as to move towards a progressive, intellectual, knowledge-driven and future-ready world.

Education 4.0 is a desired approach to learning that aligns itself with the emerging fourth industrial revolution. This industrial revolution focuses on smart technology, artificial intelligence, and robotics; all of which now impact our everyday lives. Advent of Industry 4.0 is not only affecting industries but also transforming the way jobs and education will be seen in the future. This will result in the evolution of education 4.0. The educational institutions have to produce a workforce for working in the technologically transformed era. Digital technologies, open-sourced content and global connectivity has already shown us the glimpses how the education sector is going to change during COVID19. The teaching community has to embrace change and harness the opportunities created by the advent of these technologies. The transformation will make the education more personalised, peer-to-peer, and a continuous process. The webinar will focus on future methods of learning and new technologies and tools used in this.

The webinar will focus on explaining the importance and significance of Education 4.0 which is digital transformation of Education and aligning our approach to education with the emerging challenges of the Fourth Industrial Revolution
